Career Objective

Strong foundation in Artificial Intelligence, Machine Learning, and Data Analytics. Passionate about leveraging data and intelligent technologies to solve real-world problems while contributing effectively in collaborative environments.

Education

B.E. – CSE (Artificial Intelligence & Machine Learning) 2022 – 2026
Vel Tech High Tech Dr. Rangarajan Dr. Sakunthala Engineering College CGPA: 8.78

Higher Secondary Certificate (HSC) 2022
Kalaimagal Matriculation Higher Secondary School Percentage: 93%

Secondary School Leaving Certificate (SSLC) 2020
The Dawn School (CBSE) Percentage: 82.8%

Technical Skills

Programming Languages	Python, SQL, Java
AI Tools	Anthropic Claude, OpenAI ChatGPT, Google Gemini, Microsoft Copilot, Hugging Face, LangChain, Jupyter Notebook, Google Colab, scikit-learn
Version Control	Git, GitHub
Core Competencies	Data Analytics, Machine Learning, Artificial Intelligence
Soft Skills	Resilience, Collaborative, Leadership, Communication, Logical Thinking

Projects

Advanced Metadata Generation: Utilizing RAG for Enhanced Accuracy

- Developed a local RAG-based application to generate metadata and answer queries from unstructured PDF documents using LLaMA 2, FAISS, and SentenceTransformers.
- Enhanced semantic search accuracy and automated metadata extraction, eliminating manual efforts and ensuring privacy.
- **Tools/Technologies:** Python, LLaMA 2, FAISS, SentenceTransformers, LangChain, PyMuPDF.

Leveraging the Power of VGG-19 CNN for Skin Disease Diagnosis

- Developed a deep learning model using VGG-19 to classify skin diseases such as Atopic Dermatitis and Melanoma from medical images.
- Applied image preprocessing and transfer learning to improve classification accuracy and model performance.
- Automated skin disease detection to reduce manual diagnosis and support early clinical decision-making.
- **Tools/Technologies:** Python, VGG-19, TensorFlow/Keras, NumPy.

Adaptive & Explainable Intrusion Detection System Using Denoising Autoencoder and XGBoost

- Built a two-stage intrusion detection system using a Denoising Autoencoder and XGBoost on the UNSW-NB15 dataset.
- Enabled explainability with SHAP and risk-level assignment using fuzzy logic.
- Designed a backend for logging and monitoring.
- **Tools/Technologies:** Python, TensorFlow/Keras, XGBoost, SHAP, FastAPI, MySQL, AWS EC2.

Intellora: Local-First AI Learning Companion

- Built an AI-powered learning platform that answers questions from uploaded documents, websites, and YouTube transcripts using retrieval-augmented generation with source citations.
- Developed features for AI-generated courses, lessons, quizzes, flashcards, spaced-repetition reviews, progress tracking, and interactive knowledge maps.
- Designed the system to keep learning data and document embeddings local by default, with optional cloud AI providers.
- **Tools/Technologies:** Python, FastAPI, React, TypeScript, SQLite, ChromaDB, Ollama, LLMs, RAG.

Certifications

- Certified in Fundamentals of Deep Learning – NVIDIA (2023)
- Certified in Data Analytics Job Simulation – Deloitte (2025)
- Certified in GenAI – Guvi (2024)
- Certified in Cyber Security and Privacy – NPTEL (2024)
- Certified in The Joy of Computing using Python – NPTEL (2023)
- Claude Certified Architect - Foundations (2026)

Internship

Mobile App Development Intern 2024
NSIC

- Gained practical knowledge of Android app development using Android Studio.
- Learned key concepts like activity lifecycle and basic UI/UX design principles.

Leadership Experience

- Appointed Sports Team Captain in school, leading and organizing athletic teams.
- Took initiative in organizing college events, handling coordination and execution as part of event committees.
